PROFILE

Software developer building web and business systems end to end, from interface and data model through to deployment on live hosting. Recently completed a Bachelor of Computer Information Systems at Pokhara University, and currently developing independent products - an education ERP, a business CRM and a civic accountability platform - alongside company and client work.

EXPERIENCE

Independent Software Development 2026 - Present

[Freelance](#) · [Nepal](#)

- Design and build web products end to end - interface, backend and deployment.
- Work directly with clients to turn rough requirements into a shippable scope.
- Deploy and maintain PHP/MySQL applications on shared cPanel hosting.

Web Developer 2025 - Present

[Sarathi Service Pvt. Ltd.](#)

- Built and maintained the company website as part of the in-house team.
- Worked to real delivery deadlines alongside non-technical stakeholders.

NameButwal - Institute Website 2025

[Client project](#)

- Delivered the website for NAME Education Butwal, an entrance preparation centre.
- Handled the project end to end - scope, design, build and deployment.

EduCore ERP & Byabastha 2025 - Present

[Own products](#)

- Designing and building a school ERP and a retail management platform.
- Responsible for the data model, permissions, interface and deployment in both.

NetaTrack - Civic Accountability Platform 2025 - Present

[Personal product](#)

- Defined the product concept: track political promises against delivered outcomes.
- Built the data model, admin tooling and public-facing tracking interface.

Jyotish Sarathi 2025 - Present

[Product development](#)

- Contributed to a cross-platform application serving a traditional practice digitally.
- Worked on application structure, API integration and release builds.
